							Action captured frozen so a bit static. Good exposure. A lot of detailed subject matter taking attention away from bikers. Technically there is some banding in the sky, which may be a result of low bit depth such as can happen in jpg. If not using it, shoot in raw. Also be careful about over processing.	The subjects are not in focus and there is a lot of banding in the sky.	
Gold	Variable	340	Flying motorcycles	8	7	6		21	2
							Nice colours, shapes and lines, but composition very weighted to the right side where the circular objects are, and this results in visual imbalance.		
Gold	Creative	340	Glass Creation	7	7	7.5		21.5	0.5

										Nice choice of shutter speed and exposure. the wide angle shows a lot of the foreground of the river, which while nice, is taking emphasis off the falls which are very interesting. Cropping just above the rock where the white foam is on left, would give a better balance to the subject matter. Fill in or really darken the bit of light sky top right, as it draws the eye.
